

# Coronavirus / COVID-19

Over the past several weeks, the F.W. Webb Company has responded to the COVID-19 challenge by providing our customers with state-of-the-art viral disinfection services. These critical services not only safeguard our customers' employees and vital services, they also help to support our nation's industrial capacity during this crisis. Through our sister company, Alliance Environmental Group, we will continue to battle this viral contagion throughout the Northeast and across our entire company footprint. We have established a Coronavirus hotline (833-918-1882) and are ready to assist you with disinfection services after a positive COVID-19 detection or as a preventative measure to safeguard your facility. Trust F.W. Webb to elevate your safety.

Sincerely,

Robert Mucciarone,  
COO  
F.W. Webb Company

Disinfection/Decontamination and Preventative Cleaning are taken very seriously at F.W. Webb. Rigorous safety reviews are conducted by scientists at Alliance Environmental Group's -

Pathogens Division - prior to deployment of personnel to a facility with potential exposure to the Coronavirus or any other pathogenic organism. Our experienced teams evaluate all aspects of disinfection including exposed areas, facility layout and other key factors to reduce the risk of cross-contamination. This ensures the safety of our personnel, our customers and the general community.

## Services:

**Disinfection/Decontamination** - disinfecting of areas impacted by or exposed to suspected or confirmed cases of SARS-CoV-2 (COVID-19).

**Preventative Cleaning** - cleaning of all surface areas or work spaces exposed to employees or the public (highly recommended to reduce the risk of COVID-19).

- Wipe down of horizontal surfaces (e.g., tables, chairs, floors, ledges, railings, etc.) and high traffic/touch point areas (e.g., buttons, knobs, handles, etc.) using CDC-recommended and EPA-registered disinfectants and virucides.
- Portable fogger machines with disinfecting solution are utilized for smaller areas. These machines distribute disinfecting solution through an entire room or enclosure.
- Portable Ionized Hydrogen Peroxide Disinfectant Systems are a state-of-the-art technology and system utilized for larger areas with remote operation capabilities to limit exposure.
- Proper consolidation, transportation, and disposal of all waste including used personal protective equipment (PPE).

# Coronavirus / COVID-19

## Our Personnel

Our skilled employees have undergone the highest levels of training including:

- 40-Hour OSHA HAZWOPER Training and 8-Hour Annual Refresher
- Bloodborne Pathogens Training and Annual Refresher
- Infectious Hazard Response Training

## Methodologies

Cleaning methodologies vary based on customer needs, the type and size of a facility, and a multitude of other factors. At the start of each project, a dedicated Senior Scientist will evaluate the scope of work and develop a detailed decontamination/disinfection plan, which will then be reviewed and evaluated by Alliance Environmental Group's COVID-19 Response Management Team.

Prior to entering the work area each day, all project personnel assemble to discuss the approved work plan, associated standard operating procedures (SOPs), job safety analyses (JSAs), all planned activities, potential hazards, likely required mitigation procedures, proper PPE, and other topics. Clear, concise, and timely updates are provided to all parties involved throughout the project.

## Duration of Disinfection and Preventative Cleaning

Depending on the size and complexity of a project, average disinfection service times can vary from 4-hours to several days. Our experts are available to discuss the disinfection requirements at your facility and to provide you with an accurate project schedule.

## Project Costs

The cost of disinfection/decontamination and preventative cleaning services depends on multiple factors including the size of a facility, the type of operations and equipment, and the location.

F.W. Webb Company has established a competitive COVID-19 rate schedule for our customers. Our experts will provide pricing estimates for your facility.

## The Next Steps: Setting Up Your Business for On-Call Services

1. Work Contract: Sign the F.W. Webb Work Authorization.
2. Credit Application: Similar to the Work Authorization, setting up credit with F.W. Webb Company allows for quick response to disinfection services. If you are an existing F.W. Webb customer, you may issue a purchase order (PO) against your customer number.
