

Viral Decontamination Response

Decontamination Response to Coronavirus (COVID-19) Outbreak

Alliance Environmental Group, an F.W. Webb Company, is committed to providing the highest professional services with regard to emergency response for the control of pathogens and viral agents. Teaming with our strategic partners, Alliance Environmental Group is ready to provide emergency response decontamination of pathogens throughout the F.W. Webb footprint. We can work with numerous federal, state and local agencies as well as a wide range of insurance companies, commercial and private clients.

We establish highly-defined and controlled support, entry, decontamination and hot zones to ensure the safe entry/exit of response personnel and the protection of non-response personnel from affected areas. We only use approved and highly-effective hospital-grade disinfecting agents for decontamination response events. Our highly-trained entry personnel are protected by using the highest-grade protective equipment and following the most stringent entry/exit procedures. Our team's decontamination procedures meet or exceed recommendations and work practices established by the Centers for Disease Control (CDC), Occupational Safety & Health Administration (OSHA), World Health Organization (WHO) and other agencies.

Let F.W. Webb
elevate your safety.

Our decontamination response
is second to none.
